

HANOVER GREEN VETERINARY CLINIC

HANOVER GREEN VETERINARY CLINIC GERIATRIC PACKAGES AND TERMS

GERIATRIC PACKAGES

Here at **Hanover Green**, we are concerned about the health of all our patients, but especially our senior citizens. As pets age, weight management, dental care, joint instability, joint pain, incontinence, and loss of sight or hearing are all potential risks that can be alleviated with proper care and nutrition.

Twice yearly exams, which include teeth cleaning, blood profiles, blood pressure screening, and nutritional analysis can add years to your pet's life.

Ask our veterinary staff today about our geriatric care program.

Doctors are available by appointment. Pets can be dropped off in the AM and picked up after 4PM. Boarding services are also available.

Geriatric Health Profile

Allows us to assess function of many internal organs such as the liver and kidneys and determine if preventative measures should be taken.

Complete Blood Count

Allows us to determine if a patient is dehydrated, anemic, or has an infectious or inflammatory process.

T4

Allows us to determine if a patient is suffering from hypothyroidism or hyperthyroidism, both metabolic disorders that can affect your pet's health.

Urinalysis

Allows us to evaluate the urine for infection, inflammation, or crystals. A urinalysis may also allow us to evaluate your pet's kidney function.

Tonopen

The tonopen is an instrument that measures the pressures in your pet's eyes. This instrument allows us to screen for the development of glaucoma.

Blood Pressure Monitoring

Allows us to evaluate possible heart disease and compromised kidney function in some patients.

Thoracic and Abdominal Radiographs

Allows us to identify masses in the chest and abdomen, as well as to evaluate the heart and lungs in the chest and gastrointestinal foreign bodies in the abdomen.

Ultrasound

Gives a more detailed picture of the structure of your pet's internal organs and may allow us to identify masses, cysts, or any abnormal architecture of these organs.

Basic Package:

Service:	Service Value:
Physical Examination	\$45
General Health Profile	} \$175
Complete Blood Count	
T4	
Urinalysis	\$40
Tonopen	\$25

Total Value: \$312

**With FREE Physical Exam and a
Discount of \$50 off Total Services**

Package Price: \$217

***Package also includes a 50% discount on any dental procedure.

EKG

Shows us the electrical current that allows your pet's heart to beat. Abnormalities identified may allow us to diagnose a primary heart condition.

Echocardiogram

An echocardiogram is basically an ultrasound of the heart and allows us to assess the function of the heart.

Dental

A once yearly dental cleaning, much like the procedure performed by your dentist, can help prevent periodontal disease. A dental cleaning involves scaling of all teeth, checking for pockets of infection, loose teeth, and exposed nerve roots, as well as polishing.

While a yearly dental procedure does provide cosmetic advantages such as clean teeth and fresh breath, it can also improve your pet's general health. Infection and inflammation in the mouth can affect your pet's entire body and can lead to other more serious medical problems such as heart & kidney disease.
