

Hanover Green Wellness Packages

Dr. Winters feels that preventative medicine is just as important as routine medical care. The following packages are designed to not only diagnose any possible ailments, but also serve as an annual reference for any future diagnostic tests. The health of a pet should not only be addressed when it is ailing, but rather when it is thriving.

Canine Wellness Package

DHLPP Annual Vaccine w/ Physical Exam \$55.00

General Health Profile

General Health Profile – Allows us to assess the function of many internal organs such as the liver and kidneys and determine if preventative measures should be taken.

Complete Blood Count – Allows us to determine if a patient is dehydrated, anemic, or has an infectious or inflammatory process.

T4 – Allows us to determine if a patient is suffering from hypothyroidism, a metabolic disorder that can affect your pet's health.

Urinalysis – Allows us to evaluate the urine for infection, inflammation, or crystals. A urinalysis may also allow us to evaluate your pet's kidney function.

Heartworm/Lyme/Ehrlichia Test – Allows us to determine if you pet may be positive for heartworm disease, as well as tick-borne diseases like Lyme's Disease, Ehrlichia, and Anaplasmosis.

Stool Check – Allows us to determine if your pet has intestinal parasites, some of which cannot be seen with the naked eye.
